CDLD Specifications

- They can be used by [NH-22C Yamataian](#) and [NH-29](#).
- Operates for 18 hours on a charge.
- Audio pick up allows clear listening to conversations at 100 meters.
- Audio has autoleveling to prevent user from being subjected to unexpected loud noises.

CDLD Operation

When inserted into the ear and activated the nanobots in the CDLD automatically:

- Adjust color of plastiod surface device to match wearer skin tone.
- Extends a small micro-microphone out of the external auditory canal.
- Adjust exterior plastiod surface to ensure proper fit.
- Auto equalizes air pressure in the ear canal to match external pressure by opening and closing microtubals.

Activation/Deactivation is by pressing a micro-switch.

CDLD Auto Destruct

Pressing the on/off switch 6 times in rapid succession triggers the destruct. The nanobots break down the CDLD into an simple organic comound.

Warning: Destruct should not be engaged while device is still in ear. Severe burns to the auditory canal could occur.

Cost: Not available on the market for civilians

- costs 300 KS
