Standard Lifts

Note: This page is being worked on to add details regarding the SAOY Lifts. — Nashoba 2020/05/17 18:34

The lifts provide quick access from deck to the deck. Lift can also be used to travel to other ships when vessels link together (most Star Army ships have standard gauges of lift systems, allowing lift cars to move from ship to ship).

Starship Lifts

Standard Lifts are commonly used for vertical movement. Lifts are controlled by the ship's computer.

Emergency Facets

- Lifts have internal life support should the vessel or a portion of, decompresses.
- Manual controls are located next to the entrance. They allow an occupant to raise or lower the lift to the next level.
- Lifts have force fields to prevent decompression.

Space Station Lifts
