PANTHEON

PANTHEON, the *Projected-Access Nodal Transuniversal Heuristic Electronic Operations Network*, is a massive, multi-tiered system of networked artificial intelligences and subsystems (each collectively known as a node). It is the backbone of all Yamataian military communications and intelligence.

For secure civilian communications in Yamatai, see SYNC.

Sapient PANTHEON AI were previously assigned a rank but as of YE 34, they begin at the Santô Hei and get promotions just like any other person in the Star Army.

History

In YE 35, the NH-22C “Yamataian” species lost access to PANTHEON because it was replaced by the Minkan in YE 31.

PANTHEON Systems

- PANTheon Integrated Electronics System (PANT-IES)
- KAMI
- MEGAMI
- Warship Integrated Electronics System (WIES)
- Escort Integrated Electronics System (EIES)
- Compact Integrated Electronics System (CIES)
- Armor Integrated Electronics System (AIES)
- Backup Integrated Electronics System
- PANTHEON's Eye Covert Sensor Probe
- Type 33 Star Army Communications Network Encryption System

MERLIN

MERLIN, the Military Encrypted Reciprocal Long-range Interstellar Network, is a secure peer-to-peer communications network developed by Kessaku Systems for use by Star Army of Yamatai personnel and starships. It is a physical system of quantum ansibles.
