

Artillery Trailer, STV, Type 31

The Type 31 STV Artillery Trailer is a simple traditional/caseless convertible 105mm cannon based on the trailer for the [Type 30 Surface Terrain Vehicle](#). The [Star Army of Yamatai](#) brought these weapons into service in [YE 31](#). Damage: Tier 8, Range 24 km (15 miles)

Its ammo tray must be manually reloaded but it automatically feeds the ammo from the tray. The cannon can be aimed via telepathy by authorized nearby Nekovalkyja. If not using caseless ammo, the spent casings are automatically ejected back down into the feeder tray where a laser detects their removal and readies the cannon again. Damage: Tier 8
