

Ke-Z1 Series Anti-Starship Torpedoes

The Z1 series torpedoes are a new breed of lightweight torpedoes for use by the [Star Army of Yamatai](#). Although slower than the [AS-7 Series Torpedo](#) series, the Z1 is highly miniaturized (only 2.25 meters long and 0.50 meters wide), allowing ships to store large numbers of them or to dedicate more space to other functions. Z1 torpedoes also include a quick-swap capability that allows various warheads to be placed on the common base.

The Ke-Z1 Series Anti-Starship Torpedoes were designed in [YE 30](#) for use in [YE 31](#).

Module	DRv3	Description
Aether	Tier 12, Heavy Anti-Starship	Single target only
Anti-Shield	Tier 9, Heavy Anti-Mecha	Damages shields only
Anti-Matter	Tier 8, Medium Anti-Mecha	Area effect
High Maneuverability	Tier 5 Medium Anti-Armor	Extra maneuvering engines to increase accuracy

The torpedoes use a small [Continuum Distortion Drive](#) that propels the torpedo at 12 times the speed of light (3c in a Level 3 [Anti-FTL Field](#) and .75c in a Level 4+).

Note: Torpedoes must drop out of FTL prior to making their attack.
