

Ke-M6-W2901 Pulse Energy Weapon

This weapon is mounted into the forearms of the [Daisy M6 Infantry Power Armor](#). As the armor will be carrying extra [LASR](#) magazines in its thigh slots, designers considered a built-in option like the [Kylie](#). They are powered as long as the armor is. The weapons are actually set so they can be used while the armor is holding a rifle in attack position, rising out of the forearms and turning like a small turret. The Pulse Energy Weapon also has a stun setting.

- Purpose: Anti-personnel
- Damage: Tier 4, Light Anti-Armor (See [Damage Rating \(Version 3\)](#))
- Range: 500 meters. Max 750 meters.
- Rate of Fire: 700 shots/min (normal).
- Payload Effectively unlimited as long as the armor is powered.
