

ISS Shiori

The ISS Shiroi is owned by the [Yugumo Corporation](#), originally a modified [Misha-Class Explorer](#), it is now a 1C Model with [Chairman Upfit Package](#), [Umikagami Subsurface Operations Suite](#), [Sorakagami Aerospace Operations Suite](#), and [ELECTRA](#), registered in the [Yamatai Star Empire](#) as [PYX-C5X-0001](#).

About The ISS Shiori

A ship is *never* just a ship. Facts about the ISS Shiori are below.

ISS Shiori	
Name	ISS Shiori
Namesake	 Shiori , means “guide” in Yamataigo (邪馬台語)
Former Owner	Motoyoshi Eidan in the care of Motoyoshi-Ieyasu Taro
Owner	Motoyoshi Eidan
Port of Registry	Amatsu-Motoyoshi "Port Hachidori" , Jiyuu II Orbit
Home Port	Jiyuu III

ISS Shiori	
Builder	Yugumo Corporation
Class	Misha-Class Explorer
Comissioned	YE 42
Registry	PYX-C5X-0001
Status	Active

The *ISS Shiori* was constructed in early [YE 42](#), it was the prototype model of what would become the [Misha-Class Explorer](#). It was given to [Motoyoshi Eidan](#) in the care of [Motoyoshi-Ieyasu Taro](#), under the direction of the [Motoyoshi Clan](#). The ship is designed and modified to be a functional home and live experience classroom dedicated to the education of [Motoyoshi Eidan](#).

In [YE 43](#) it became the *YCS Shiori*, when it was taken back into the [Yugumo Corporation](#)'s fleet.

In late [YE 44](#), the ship was upgraded to the 1C and upgraded with the [Chairman Upfit Package](#)¹⁾. It was transferred to the ownership of [Motoyoshi Eidan](#), once again becoming the *ISS Shiori*, and set out into the black.

Theme Music

The playlist for the ISS Shiori will expand as time moves forward.

- Theme Song: [Best I Can - Art of Dying](#).

The Ship's Patch

The ISS Shiori's ship patch is below.

The ship's patch features the mon of the [Motoyoshi Clan](#) as well as the iconic hummingbird design that was featured on the logo of the former [Fifth Expeditionary Fleet](#) with an image of the ship nestled between two wings. The symbols invoke nostalgia and important historical references for the [Motoyoshi Clan](#).

Uniforms

Shiori crew duty uniforms, part of their [Yugumo Corporation Standard Issue](#), consist of [Type 43 Yugumo Corporation Uniforms](#), bearing the [Takeda Fleet](#) emblem on the right shoulder, and the Shiori ship's patch on the left. [Yugumo Corporation rank insignia](#) are worn on the jumpsuit. When outdoors planetside, a [black beret](#) with the ships patch on the flash is worn as headgear.

The [Type 43 Yugumo Corporation Uniforms](#) worn aboard the Shiori use a different color scheme than standard. Rather than the purple one-piece dress or light charcoal jacket with darker trousers, both uniforms are a deep, dark charcoal that is nearly black even under close inspection, and feature gold trim. [Coveralls](#) and [security response armor](#) are also dark charcoal and have the same patches and insignia. [Flight suits](#) are dark charcoal with dark purple panels and gold trim.

Advanced Education Program

In [YE 44](#), when [Takagawa Hitomi](#), a veteran educator, was asked to rejoin the ISS Shiori, the decision was made among her, [Motoyoshi-Ieyasu Taro](#), and [Ketsurui-Motoyoshi Katsuko](#) to devise an advanced curriculum with real accreditation for [Motoyoshi Eidan](#) and the hand-picked prodigies who would accompany him.

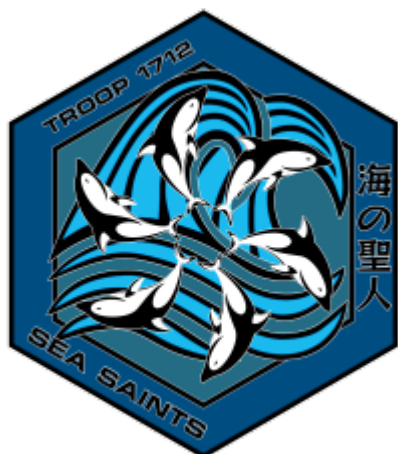

In association with the [Colonial Sector University System](#), the decision was made to create an experimental pilot program for exceptional youth in their last years of secondary education or first years of tertiary education. The initiative is under the auspices of a consortium consisting of [Tokyo University](#) and the [Scientific Studies Service Gakuin Academy](#), with support from the [Kyouso Institute of Technology](#), the [Tsubomi School System](#), the [Kikyō Scouts](#), the [Shima Oceanographic Institute](#), and the [Jiyuu University for Agricultural Studies](#).

The ISS Shiori is considered a [Kyouso Institute of Technology Remote Campus](#) and [SSS - Satellite Campus](#), as well as a campus of the [Colonial Sector University System](#) for purposes of credit recognition and transferability.

Kikyō Scouts Troop

The ISS Shiori is a functioning [troop](#) of the [Kikyō Scouts](#) with [Takagawa Hitomi](#) as its [leader](#).

The Troop's number is 1712, after the [grid sector](#) of the [Taiie](#) system, colonized in [YE 28](#) by the [Fifth Expeditionary Fleet](#) under its commander [Ketsurui-Motoyoshi Katsuko](#), grandmother of [Motoyoshi Eidan](#). The star was destroyed during the [First Mishhuvurthyar War](#) in [YE 29](#) by the [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#), leaving behind the [Taiie Nebula](#). In memory of the capital of the colony, [Seijin no Umi, Port City of Taiie](#) on [Taiie IV](#), the troop's mascot is the "Sea Saints," based on the [Trade](#) translation of the [Yamataigo](#) name: "Saint of the Sea."

The troop is known as Troop 1712 "Sea Saints" among the [Kikyō Scouts](#).

History

The ISS Shiori was constructed and launched in early [YE 42](#).

A Hands-On Yamataian Education: Eidan's Guide To The Kikyo Sector

In [YE 41](#), [Motoyoshi Eidan](#) and his father, [Motoyoshi Tio](#), received protection and were reinstated into the [Motoyoshi Clan](#) by [Ketsurui-Motoyoshi Katsuko](#). This move aimed to shield [Motoyoshi Eidan](#) from the threats posed by [Motoyoshi Kiyoko](#) and her Tange followers, who sought to capture, harm, or exploit him for anti-[Yamatai Star Empire](#) propaganda on [Jiyuu III](#) and other former United Outer Colonies worlds.

Reluctantly, in [YE 42](#), [Motoyoshi Tio](#) accepted [Ketsurui-Motoyoshi Katsuko](#)'s plan to place [Motoyoshi Eidan](#) under the care of retired [Star Army of Yamatai Shôshô](#), [Motoyoshi Clan](#) legend [Motoyoshi-Ieyasu Taro](#). Katsuko insisted that Taro would provide Eidan with an education centered on [Yamatai Star Empire](#)

teachings and [Motoyoshi Clan](#) traditions and philosophies, shaping him for a future in the [Star Army of Yamatai](#). The concept of the ISS Shiori, a vessel for hands-on education, was conceived by [Motoyoshi-leyasu Taro](#), with the hope of guiding Eidan away from the troubled path taken by his father, [Motoyoshi Tio](#).

[Motoyoshi-leyasu Taro](#), a veteran of the [Fifth Expeditionary Fleet](#), played a pivotal role in the colonization and exploration of numerous planets. In addition to imparting knowledge about the [Yamatai Star Empire](#), he wished to instill his passion for exploration and frontier pioneering in [Motoyoshi Eidan](#). Selecting the right crew members and implementing security modifications became crucial to safeguard against potential threats from [Motoyoshi Kiyoko](#) and her followers.

Over the course of a year, the ship journeyed to secure areas within the [Kikyo Sector](#) for [Motoyoshi Eidan](#)'s safety. They also made several visits to [Yamatai](#), where Eidan and the crew participated in [Hanami](#)²⁾ and [Year-End Traditions](#)³⁾. During the ship's final voyage with Eidan aboard, they visited the [Taie System](#), which included a special late-night video call with his grandmother, [Ketsurui-Motoyoshi Katsuko](#).

In early [YE 43](#), the [Kuvexian War](#) concluded with the [Battle Of Glimmergold](#). It was decided that [Motoyoshi Eidan](#) would attend school at [Tsubomi](#), now safe from the threats posed by [Motoyoshi Kiyoko](#) and the Tange Clan.

In the aftermath, [Takagawa Hitomi](#) retired to a cottage provided by the [Motoyoshi Clan](#) at [Ainu Orchards](#)⁴⁾, [Nakada Masuyo](#) was reassigned to the ISS Asagiri, and [Motoyoshi-leyasu Taro](#) resumed his duties within the [Motoyoshi Clan](#).⁵⁾

As the YCS Shiori

In [YE 43](#), the ISS Shiori underwent a transformation and became a part of the [Yugumo Corporate Fleet](#), receiving a new designation as the YCS Shiori. Its initial mission as a member of the [Yugumo Corporate Fleet](#) involved transporting [Yugumo Corporation's Fuku-Kaicho](#) to the [Draco Eridanus System](#) for a scheduled meeting with the [Mining Guild](#). During this journey, Yuka's daughter, [Motoyoshi-Igarashi Yue](#), accompanied her.⁶⁾

Hinomaru Sunrises

In [YE 44](#) the ISS Shiori was once again used for [Motoyoshi Eidan](#) and [Motoyoshi Kuroko](#) when they left along with the [Motoyoshi Colonization Fleet](#)⁷⁾. [Motoyoshi Eidan](#) and [Motoyoshi Kuroko](#) were sent out ahead of the [Colonization Initiative Alliance fleet](#) to ensure their safety given the tumultuous climate after the terrorist attack on the [capitol dome](#)⁸⁾. They were accompanied by a select group of elite peers for Eidan to develop his leadership as they developed skills in an elite, unique educational environment.

With the ship's ownership returned to [Motoyoshi Eidan](#), the designation was once again changed back to the *ISS Shiori*.

- [Mission 002: A New Recipe for Dessert](#)
- [Mission 002: A New Recipe for Dessert, Continued](#)

To A New Star

In the first month of [YE 45](#), the ship and its young crew encountered an inhabited system, far out rimward from the [Kikyo Sector](#) (In the [Kosuke Sector](#)), designated YC-56K⁹⁾ by their charting system. Submerged beneath the ocean on the planet Becurn (YC-56K III). The crew, led by [Motoyoshi Eidan](#), is observing a brutal war between the [Cemlae](#) and the [Mocadians](#). After weeks of covert observation, the ship decides to depart due to the escalating conflict, carrying valuable information about the warring nations.

[Motoyoshi Eidan](#), along with [Kuroko](#) and other crew members, experience a mix of emotions during their time underwater and in space. They engage in banter, sharing playful moments and bonding, providing relief from the stress of their mission. [Leon](#)'s curiosity and casual presence add to the dynamic. [Kuroko](#)'s jealousy surfaces when [Motoyoshi Eidan](#) teases her about indulging in his strawberries. Tomoko's cryptic comment about strawberries adds intrigue to the situation, leaving everyone guessing.

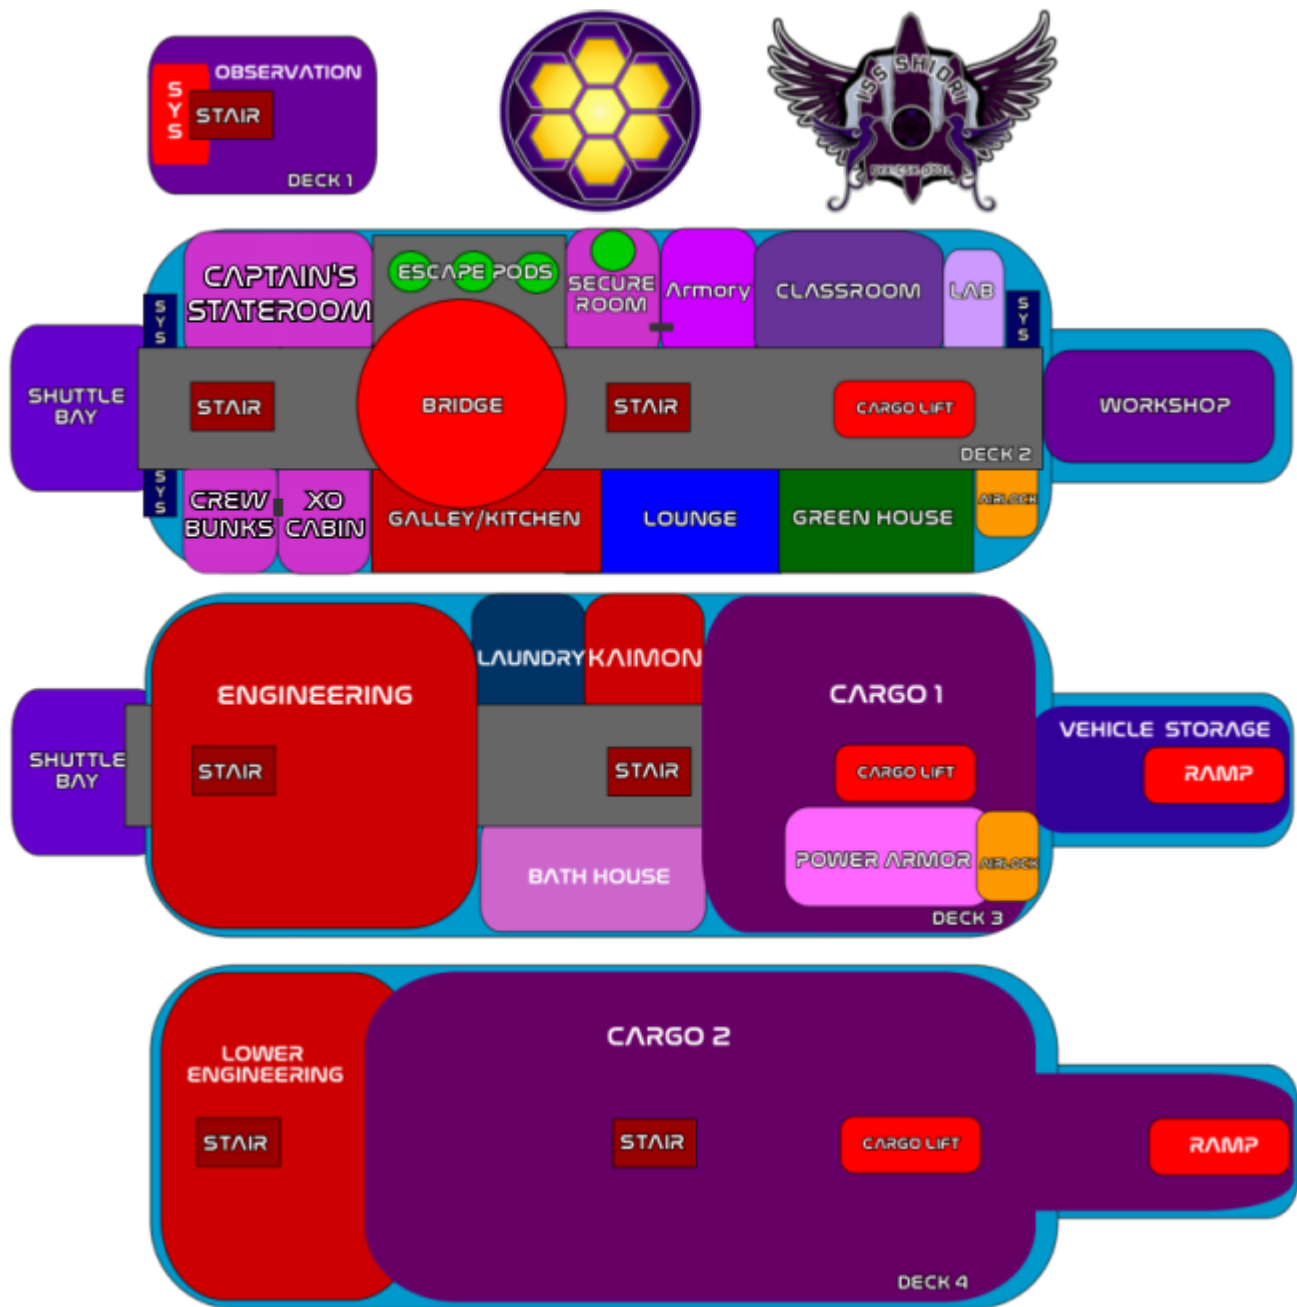

[Hitomi](#), the ship's leader, announces her departure and hints at an important mission. This news surprises the crew, and they prepare to assemble in uniform to learn more about her mission and the ship's future. As the crew navigates their roles and relationships aboard the ISS Shiori, they remain curious and anticipatory, ready for the challenges and adventures that lie ahead.¹⁰⁾

Modifications

These modifications have been made which vary from the original design of the [Misha-Class Explorer](#), besides the [Chairman Upfit Package](#) and 1C update and subsequent additions of [Umikagami Subsurface Operations Suite](#), [Sorakagami Aerospace Operations Suite](#), and [ELECTRA](#).

Deck Layout

The deck layout and interior spaces of the ship have been modified:

Compartments

The following compartments have been added or modified:

Secure Room

A sealed and access-controlled panic room designed for the protection or escape of [Motoyoshi Eidan](#) and [Motoyoshi Kuroko](#) in the event of an emergency or the ship is compromised. The room has its own

independent life support, emergency supplies and secured crawlspace access to the Armory in the next compartment over. The crew has been trained that if a situation occurs that the number one priority of every on the ship is to get [Eidan](#) and [Kuroko](#) to the secure room, at any cost. (The security system uses [Forcefield-Nested Isolation Doors](#) to secure the compartment.)

Armory

The [Shiori Style Standard Armory](#) is secured behind [Forcefield-Nested Isolation Doors](#) and is access-controlled. The room is fully stocked with weapons and equipment for use by the crew.

There are also safety deposit boxes here for the use of crew or passengers who wish to keep valuables under lock and key, as well as the ship's safe. These safes and boxes are designed to shunt into a modified "[Ikigai](#)" [Type 43 Escape Pod](#) and eject, traveling to a pre-programmed target in the case of catastrophe.

Brig

A divided off part of the Armory serves as a small [brig](#). There's a bench with a rail for attaching restraints for short-term detention, with an open shower and head, and a water fountain. A pair of [Transparent Durandium](#) holding cells are for longer-term occupancy, with floor drains, spartan bunks featuring restraints, and sink/fountain/toilet combos. The Brig's entrance, along with the officer on duty's desk, is located between the [Forcefield-Nested Isolation Doors](#), making it impossible to get directly from the Brig to the Armory proper.

Bathhouse

Because the cabins on the ship have at least their own showers and toilets, customizations have been made from the [standard Misha-class bathhouse](#). It retains the head, but adds the locker rooms one would find at a public bathhouse or swimming pool. The rest has been made to resemble a luxurious hot springs [onsen](#), not unlike a [Star Army Onsen](#). There is also a wooden [sauna](#) room off the locker room, and an area with a pair of all-in-one exercise machines.

Captain's Stateroom

Spanning the area of two of the standard cabins, [Eidan's](#) luxurious stateroom is designed for his comfort, entertainment, and convenience. Upgraded from the standard shower and head into a full Yamataian-style washroom, featuring separate shower, steam-room, and soaking tub with whirlpool jets, it occupies a corner of the space, cutting the room into an L-shape. The small end of the L is a walk in closet with wardrobe and vanity. It has entrances from both the bedroom and washroom, and features gear storage for [Eidan's Yugumo Corporation Standard Issue](#), with room to spare for nearly anything else he wishes. At the crux of the L is a kitchenette and breakfast nook, with small, angled canopy bar with full back and stools on the opposite corner, while the entrance at the long side of the L opens into a foyer and sitting

room with couches and coffee tables huddled around a simulated fireplace. Beyond it, before the kitchenette, is a well-appointed office alcove with a desk and chair and computer terminal allowing [Eidan](#) to study and conduct business from his stateroom. The wall between the office alcove and the soaking tub is mostly a large aquarium. Across from the desk, a multifunction all-in-one exercise unit is cleverly out of the way in another alcove. For covert communications, any mirrored surface in the stateroom functions as a [Lying Mirror](#). On the bed is the coveted [Hyper-Tempri-Sama blanket](#).

Classroom

The classroom is a state-of-the-art learning center designed to incorporate multiple volumetric interfaces and media as well as virtual reality for enhanced visualization. The integrated projection system allows the entire structure of the room to become the medium for presentations, remote viewing of music and art performances and even attendance to various classroom environments at different academies across the [Yamatai Star Empire](#).

The curriculum designed for [Eidan](#) and [Kuroko](#), in addition to the standard academics, includes submissions from several members of the [Motoyoshi Clan](#) which share their testimony of non-classified procedures and experiences in the [Star Army of Yamatai](#).

Computer Chamber

There is a [Yugumo Standard Anthroform Drone Berth](#) for the [KAIMON/Ascendant Consort](#) body of the ship's [KAIMON/MIKO](#) avatar, Yūgumo Shiori.

Shiori's avatar, whether the [projected](#) or [android](#) manifestation, has access to one each of the [emergency lockers](#), and a [housekeeping closet](#) for her use.

Another [Drone Berth](#) and its rack and the storage between the two berths contains her [power armor and loadout](#).

Drone Hive

A hexagonal prism rises from floor to ceiling, its sides covered in 24 hemispherical sockets that each house a [KAIMON/Ascendant Companion](#) for quick charging and diagnostics. Internal systems allow the installation and removal of their various attachments. They have access to all parts of the ship from this chamber through the maintenance conduits.

Crew Bunk

Four sets of [Type 40 Bunk Beds](#) in the [Deluxe Three Bunks, Desk, and Drawer/Wheels](#) configuration face each other from across the narrower dimension of the room. Each desk is connected to a [Ge-T8-E3103 - Computer Array](#) as well as the ship's [KAIMON](#) system, and below each one is a [footlocker](#). Between each

set of bunks is a pair of sliding panels, parallel and adjacent to one another that may be stowed away in a panel on the bulkhead. The panels are [Transparent Durandium](#), but the color, opacity, or reflectivity in both directions may be independently adjusted by the registered occupants of the adjacent bunk. They also function as [Volumetric Windows](#) allowing the occupants to use them as displays. The wall beside each of the the end bunks has similar features to the panels.

The Crew Cabin takes up about the same footprint as single default stateroom and features a separate locker room and latrine with a row of lockers and benches, communal, gym-style shower, four-sink vanity, and separate head with two stalls. There are two tables each with four chairs and a pair of couches in the central common area, along with a pair of all-in-one exercise machines and a free weights bench and rack. [Volumetric Windows](#) provide display for entertainment, environmental, and informational purposes.

While it isn't capable of cooking full meals, there is a refreshment and break area here with a kitchenette for the crew's snacks and drinks. There is a door to the [First Officer's Cabin](#) that can only be locked and unlocked from the other side. There are also 2 [Yugumo Standard Housekeeping Closets](#) in the crew bunk, one by the bath and one by the kitchenette.

First Officer's Cabin

The First Officer's Cabin is, unlike the rest of the cabins, mostly unchanged from the [standard suites](#) found on the stock [Misha-Class Explorer](#), aside from the luxury of the [Chairman Upfit Package](#). The Guest Cabin is a spacious bedroom, featuring a corner "L" seat, a desk with computer terminal, a closet, and a shower and head bathroom attached. A small wet bar has been added for [Takagawa Hitomi](#). There is a door to the [Crew Bunk](#) that can be locked only from this side.

Greenhouse

The greenhouse has been specialized towards two different mission profiles: food production, and the scientific study of new species, though some space is reserved for ornamentals and 🌳 [bonsai](#). The facility is capable of traditional soil-based agriculture, as well as 🌿 [hydroponics](#) or 🌿 [aeroponics](#), as well as 🐟 [aquaponics](#) for the production of fish and seafood. There are several sealed chambers with separate environmental systems for the growing of newly discovered species in quarantine. These sealed chambers can have separate lighting, temperature, humidity, and water cycles, as well as different gravity and atmospheric compositions.

Lab

The lab is set up as an infirmary and basic medical bay. Most of the science gear typically found in the lab that isn't needed for medical treatment has been moved to the classroom for educational purposes, with the philosophy that anything interesting enough to analyze in the lab would have an educational benefit for [Eidan](#) and [Kuroko](#) if they could observe and participate. This also made room for the [ATMC Ke-J1-E3301 - Autonomous Configurable Medical Unit](#) unit and [Treatment and Examination Bed](#).

Power Armor Storage

[Cargo One](#) has been modified to include a small civilian power armor storage bay that uses the already in place airlock structure.

Workshop

The workshop has had a [Star Army Fabrication Chamber, Type 39](#) installed as its centerpiece. It includes a [Civilian Synthesis Reactor Module](#) and a backup [Aether generator](#) for emergency use.

Volumetrics System

Nearly the entirety of the interior of the ISS Shiori is able to be covered by [Solid Volumetrics](#) projectors, allowing essentially the entire ship to function in a similar manner [volumetrics room on a Plumeria 2E gunship](#), Along with the ubiquitous use of [Omnihue](#) on most surfaces, and liberal use of [Volumetric Windows](#), the system allows robust virtual environments and simulations to be overlaid on the interior.

The Volumetrics System is intended for recreation, training, and briefings. Force fields have been added to provide tactile feedback to simulations as well as to slide people back imperceptibly when they try to walk too close to a wall or change elevation. In this way, simulations larger than the interior would normally permit are possible and can be safely employed. Simulations can also make people appear and sound further away than they are and nudge them away from collisions with each other if necessary to further add to the illusion. This force field sliding can be disabled easily if desired; but small markers will appear to show the walls, floor, and ceiling boundaries while the doors to other areas become visible as a safety measure. All people will be shown in their actual locations as well.

Uses of the Volumetrics System include consuming media en masse, group exercise, holding briefings with visual aids, relaying briefings from alternate locations, situational training, running combat simulations, showing simulations of home or other relaxing venues, large scale communications, as a pre-mission staging area, or even for making crew members run laps as punishment.

Additionally, there are also a variety of specialty equipment built into in retractable ceiling, wall, and floor panels all over the common areas of the ship relating to [Galactic Horizon Laser-Tag](#).

Modified Systems

Some of the systems of the ISS Shiori were modified or upgraded from the original design of the ship, but most of these were again replaced during subsequent upgrades and refits.

Backup Communications System

The Shiori retains its full suite of [MIKO Communications](#).

Backup Power Systems

The Shiori has several backup power systems installed to ensure it can remain powered through any emergency.

Secondary Power System

A [Tsuyosa Series Matter-Antimatter Reactor](#) has been added for secondary power. This system also includes a [Matter Collection System](#).

Tertiary Power System

For a backup to the backup, alternative source, or for auxiliary power in case of high demand, a [Class 3 Hyperspace Fuel Tap](#) has been installed.

Quaternary Power System

Should all else before it fail or simply require more power, a [Phoenix Fusion Generator](#) is available.

Quinary Power System

As a final fallback power generation system, [HONEY SLAM](#) fusion generator with quadruple power supply has been installed.

Propulsion

The Shiori has numerous upgrades to its propulsion systems.

Multi-Stage Turbo Plasma Drives

The [Hoshi III Series Multi-stage Turbo Plasma Drives](#) have been upgraded and tuned along with the [plasma weaponry and vernier system](#). Can be used for VTOL.

- Stat Modification: Maximum Sublight Speed is 0.375c (2.7AU/Hr).

Backup Sublight Propulsion

As a contingency backup a [Cirrostratus Ion-Grid Propulsion Drive](#) has been installed, in case of the failure of the [main sublight drives](#), or their inefficacy due to anomalous local conditions.

- Cruising Thrust (safe): 0.225c
- Max Thrust (unsafe): 0.300c

Falcon Tunnel Drive

As a backup or alternate FTL drive solution, the ship has been fitted with a [Falcon Tunnel Drive](#), which may perform better in certain astrophysical or stellographical situations than [Continuum Distortion](#) or [Hyperspace fold](#).

- Range: 15LY
- Speed: 0.2ly/m
- Charge time: 5m/ly

Supplementary Environmental Shielding

The primary [shielding](#), along with the [supplementary shielding](#) and [navigation shielding](#), has a failsafe backup [Environmental Starship Shield](#) to protect the ship, crew, passengers, and cargo from environmental hazards should the main shields fail.

Multifunction Emergency Pods

In each wing pod, port and starboard, there is a system to deploy and retract various emergency implements. Like a cross between a 🗡️ [Swiss Army knife](#) and a packed parachute, the system is automated with its own backup power, but may be manually, mechanically deployed in an extreme emergency. Each pod contains a solar panel array for emergency power, radiator for emergency cooling, antenna for emergency communications, and 🚀 [solar sail](#) for emergency sublight propulsion.

Computer Systems

The original [MIKO Electronics Suite](#) was retained with the addition of the [KAIMON](#) system, and made into a secondary, auxiliary computing, communications, and sensor suite.

KAIMON Upgrade

The [KAIMON](#) computers and sensors have been upgraded from the standard Gate model to the Super-Gate used on larger starships.

MIKO Modules

In addition to the [Science and Explorer](#) package for the [MIKO Electronics Suite](#) standard on the original [Misha-Class Explorer](#) 1A, the ISS Shiori's [MIKO](#) has been fully upgraded with all of the available packages, from the [Patrol](#), [Tactical](#), and [Scout](#) to increase the vessel's combat and reconnaissance capabilities, to the [Diplomatic](#) and [Support](#) packages to assist Kage Yaichiro with his business and other endeavors.

Internal Security

Internally, there are enough pop-out automated weapons turrets positioned as to cover the entire interior with at least three of them able to aim at any one spot, with no blind spots or effective cover. These weapons are equivalent to a [Yugumo E2 Energy Pistol](#) each, but draw power directly from the ship's power systems¹¹⁾. They are capable of firing in lethal and nonlethal modes, independently of each other. They are not capable of firing at targets outside of the ship. Additionally, hidden, armored vaults in strategic places around the ship contain actual [Yugumo E2 Energy Pistols](#), ready to open at the mental, verbal, or gesture command of an authorized person¹²⁾.

Weapons

The Shiori expands on the default loadout of the the [Misha-Class Explorer](#).

- Wings (Port, Starboard)
 - 2 each "[Taihō](#)" [Light Starship Cannon](#) - [Damage Rating \(Version 3\)](#) Tier 10 (Light Anti-Starship), 4 total.
 - 4 "[Suzukaze](#)" [Mini-Missile Launchers Type 43](#) - [Damage Rating \(Version 3\)](#) Tier 7 (Light Anti-Mecha).
- Turrets (2 Dorsal, 2 Ventral, Port, Starboard)
 - "[Tachikaze](#)" [Point Defense Cannons Type 43](#) - [Damage Rating \(Version 3\)](#) Tier 6 (Heavy Anti-Armor), 6 total
- Fuselage (Forward)
 - 2 "[Yakaze](#)" [Series Anti-Starship Turrets Type 43](#) - [Damage Rating \(Version 3\)](#) Tier 10 (Light Anti-Starship).
 - [Chōuryū Subsurface Torpedo/Sensor Platform](#), 2 tubes forward, 2 tubes aft, 4 total.
 - 1 [Variable Launch Tube](#), forward-facing
- [Plasma Projection System](#) (2 Tier Equivalent Weapons Groups)

Shuttles and Vehicles

Shuttles and vehicles on the ISS Shiori are listed below.

Shuttle Bay

There are a pair of [KAIMON/Ascendant Carrier](#) on duty here.

- 1 [Taka-Class Shuttle](#)
 - [Umikagami Subsurface Operations Suite](#)
 - [Sorakagami Aerospace Operations Suite](#)
 - [ELECTRA](#)
 - [Chairman Upfit Package](#)
 - Conversion parts to reconfigure the [main cabin](#)¹³⁾
 - Conversion parts to make a [Mōkin-Class Patrol Craft](#)¹⁴⁾
- 2 [Amatsubame-Class Runabout](#)
 - [Orchid Signature](#)
 - [Umikagami Subsurface Operations Suite](#)
 - [Sorakagami Aerospace Operations Suite](#)
 - [ELECTRA](#)

Vehicle Storage

There is a [KAIMON/Ascendant Carrier](#) on duty here.

- 5 Civilian-model [Light Surface Terrain Vehicle, Type 42](#) in ISS Shiori livery
 - 2 Standard Variant
 - Removable [Cerastic](#) Half-doors
 - [Type 42 Vehicle Recovery Winch](#)
 - [Type 42 Road Safety Kit](#); Stored in glove box.
 - Self-sealing tire inflator can
 - [EM-G16-2a First Aid Kit](#)
 - Set of collapsible pioneering tools (Shovel, pick, saw), stored underneath the hood.
 - Set of [Cerastic Traction Boards](#), under hood
 - Full [Durandium Alloy](#) doors with [Transparent Durandium](#) windows (removable)
 - 1 Extended Passenger Variant
 - As Standard Variant
 - 1 Extended Truck Variant
 - As Standard Variant *plus*
 - Extended bed cover
 - Shelter-back
 - 2 cargo boxes
 - 1 Extended 6×6 Variant
 - As Standard Variant *plus*
 - Extended bed cover
 - 750 liter liquid tank
- 2 [CAMIE M11 Construction Mecha](#) (accessories stored in trailers)
 - Set of 6 Tools
 - Crane Attachment
 - FTL-capable Trailer

- Backpack Towing Winch
- High Capacity Salvaging Net for Towing Winch
- Backpack [Scalable Graviton Beam Projector](#)
- [MultiStruct Multitool](#), small
- [Kuroko's Soyokaze/Windbreaker Cyclecar](#)
- [Hitomi's Type 32 Airbike](#)
- 1 [EM-K4-2a "Zephyr" Law Enforcement Air Car](#) in [Yugumo Keisatsu](#) livery
 - 1 [12-gauge Pump Shotgun](#), black polymer furniture
 - 1 [EM-G16-3a EMS Kit](#)
 - 1 [EM-G16-4a Trauma Kit](#)
- 10 two-place, seaworthy adventure/expedition kayaks with paddles, accessories, and safety gear
- 10 all-terrain, fat-tire bicycles with [bikepacking](#) bags, accessories, and safety equipment
- 10 [Packraft](#) with collapsible paddles, inflators, accessories, and safety equipment
- 5 [MiniMoto](#) in various colors
- 2 [Rigid Inflatable Boat](#), 8 person
- 1 [Rigid Inflatable Boat](#), 12 person
- A rack with storage for everyone's [Extreme class Hover Board](#) and [Hoverboard Extreme Clothing Gear](#)

Ship's Inventory

The Shiori and its crew are well stocked and supplied with equipment and consumables:

Drone Manifest

- 1 [KAIMON/Ascendant Consort](#), ship's optional avatar
- 24 [KAIMON/Ascendant Companion](#), in addition to personal issue
- Assorted spare [attachments](#)

Armory Inventory

The Armory is stocked with the following items:

- 8 full sets [Yugumo Corporation Security Detail Loadout](#)
- 10 [Yugumo E2 Energy Pistol](#)
- 30 [BR-E2a Battery Magazines](#)
- 10 [Sakura Type 43 "Bushi" Compact Carbine](#), 10 x 51mm Sakura
 - 1 [Multispectral Marksman Scope](#)
 - 1 single-point [Stone Thread](#) sling
 - 1 Railed Handguard
 - 1 [GH-ISAC](#) telescoping stock
 - 1 [7.62 x 51mm Ketsurui Zaibatsu](#) barrel
- 24 spare [10 x 51mm Sakura](#) barrels for [Sakura Type 43 "Bushi" Compact Carbine](#)
- 12 spare [7.62 x 51mm Ketsurui Zaibatsu](#) barrels for [Sakura Type 43 "Bushi" Compact Carbine](#)

- 64 10x51mm Sakura Magazines, 30-round
- 32 7.62x51mm Ketsurui Zaibatsu Magazines, 30-round
- 32 10 x 51mm Sakura, 100-round box
- 48 7.62 x 51mm Ketsurui Zaibatsu, 100-round box
- 10 TC Type 33/C Nekoalkyrja Service Pistol
- 20 BR-28 Series Battery Magazine
- 10 YB-28A Triple-Power Magazine
- 4 Zen Armaments .45 Caliber Pistol
 - 2 Double-stack Magazines
 - Extra barrel
- 16 .45 Zen Armaments, 100-round box
- 10 General Service Pistol, Type 28
- 20 General Service Pistol, Type 28 magazines, 15 round, 10 x 25 mm Ketsurui Zaibatsu
- 30 10 x 25 mm Ketsurui Zaibatsu, 100-round box
- 2 Westech Trench Shotgun
- Galactic Horizon 12Gauge Shotgun Shells
 - 2 Scatter Shot, box of 100
 - 2 Slug, box of 100

- A few large rolls of 🌿 [artificial turf](#)
- A crate of balls, sticks, safety and other gear, and collapsible nets and goals to play various sports
- A crate containing several [Te-G5 Adante Keyboard](#) and a couple [Te-G1 Anaba Super Karaoke Machine](#)
- 🎣 [Recreational fishing](#) rods, reels, nets, flies, lures, and accessories and safety gear, fresh and salt water.
- 2 🚚 [Hand trucks](#)
- Pool and Aquarium Cleaning Supplies and Equipment

Drone Launch

In the port forward corner of [Cargo One](#) is a system of racks, gantries, and conveyors to load various drones, probes, and satellites into a [Variable Launch Tube](#) to deploy.

- 16 [EM-O2 "Houmen" Communication Satellite](#) in launch tubes
- 8 [EM-O3 "Hirakeru" Communication Satellite](#) in launch tubes
- 24 ["Whisker" Sensor Drone](#) collapsed in launch position
- 24 [Origin Z1b Sensor Cruise Missiles](#)
- 64 [Mining Probe](#)

- 8 [Yomawari-Class NavComm Buoy](#) in launch tubes.

Power Armor Storage

- 8 [Yoru no Tenshi 'Tenshi II' Light Mechanized Power Armor](#)
 - [MIARA Ground Mobility System](#)
 - [ELECTRA](#)
 - [Sorakagami Aerospace Operations Suite](#)
 - Prepped for [Umikagami Subsurface Operations Suite](#)
 - "[Suzukaze](#)" [Mini-Missile Launchers Type 43](#), 60x150mm installed in left shoulder hardpoint
 - [Plasma Cannon](#) installed in right shoulder hardpoint
 - 2x[Plasma Gun](#), one installed in each forearm hardpoint.
- 8 sets [Umikagami](#) conversion hardpoint modules.

Cargo Two

Most items, including smaller [Standard Starship Cargo Containers](#), are kept in [SSCC-XL](#) containers that can be repurposed as [SSCC-XL Prefab Modules](#) or in an [SSCC-Huge](#). There are several empty [SSCC-XL](#) and a few empty [SSCC-Huge](#), some collapsible, stored here as well. Refrigerators, freezers, and stasis chambers are available for the storage of perishables, and hazardous materials are contained safely in blast resistant chambers behind [Forcefield-Nested Isolation Doors](#). There are a trio of [KAIMON/Ascendant Carrier](#) on duty here.

- Refills, replacables, and spares for all the various kits and equipment
- Spare parts for the ship and its systems, including additional [hull patch kits](#)
- Spare [linens, pillows, and blankets](#) and towels
- Extra [toiletries and hygenics](#)
- Lots of [Neko Sparkle](#)
- [Cleaning Supplies](#)
- An [SSCC-Small](#) full of unscented  [Castile soap](#)
- Many [SSCC-Small](#) containers full of fresh water
- Dozens of [Jerrycan Jug](#), 20L Large full of fresh water
- An [SSCC-Small](#) full of [SDI Water Filtration Device](#), various sizes
- A copper still packed in a crate
- Hundreds, possibly thousands of [Emrys Quik Paks](#) by the case
- Several spare [Emrys Quik Paks Processors](#)
- Lots of spare cooking and eating utensils, pots, and pans
- Many, many, many cases of [Emrys Emergency Rations](#)
- An [SSCC-Small](#) container full of [Star Army Kanpan](#)
- Dozens of boxes of [Star Army Emergency Ration Pill](#), 1000ct
- Several [SSCC-Small](#) of various [Tokyo Brewing Company soft drinks](#)
- A couple [SSCC-Small](#) of cases of [Moon's Nectar](#)
- Some [SSCC-Small](#) full of various packaged snack foods and sweets
- Many [SSCC-Small](#) full of assorted fruit from [Ainu Orchards](#) and [Iga Fancy Fruit Emporium](#)
- Several [SSCC-Small](#) containing assorted instant ramen and other instant noodles and soups
- A few [SSCC-Small](#) containing assorted varieties of instant curry

- Several [SSCC-Small](#) full of beef, pork, and lamb
- Several [SSCC-Small](#) full of chicken, duck, goose, and turkey

- A few [SSCC-Small](#) full of various kinds and grades of milk (cow, some goat, sheep and buffalo)
- A couple [SSCC-Small](#) full of butter
- A few [SSCC-Small](#) full of assorted kinds of cheese
- A few [SSCC-Small](#) full of various kinds of eggs (mostly chicken, some duck, a little goose)
- Some [SSCC-Small](#) full of soybeans
- A couple [SSCC-Small](#) full of miso
- A few [SSCC-Small](#) containing assorted varieties of instant curry
- A few [SSCC-Small](#) containing various kinds of concentrated bouillon
- A few [SSCC-Small](#) full of lentils
- A few [SSCC-Small](#) full of assorted kinds of dry noodles and pasta
- A few [SSCC-Small](#) containing cornstarch, potato starch, tapioca starch, and others
- Many [SSCC-Small](#) full of various kinds of potatoes, tomatoes, eggplant, and mild peppers
- Many [SSCC-Small](#) containing various kinds of root vegetables such as carrots, parsnips, turnips, radishes, sweet potatoes, beets, lotus root, 🥥 [taro](#), 🥕 [konjac](#), and 🥒 [daikon](#), with greens
- Some [SSCC-Small](#) full of various melons, squash, and cucumbers
- Some [SSCC-Small](#) full of garlic, shallots, ginger, turmeric, galangal, and various kinds of chili peppers
- Several [SSCC-Small](#) full of various kinds of onions, scallions, shallots, and leeks
- A few [SSCC-Small](#), one each full of 🍄 [kombu](#), 🍄 [katsuobushi](#), and dried 🍄 [shiitake](#)
- Some [SSCC-Small](#) full of various dry beans and legumes
- Many [SSCC-Small](#) full of assorted preserved, canned vegetables and fruits
- An [SSCC-Small](#) of black peppercorns
- Some [SSCC-Small](#) full of various grades and types of sugar and 🍯 [jaggery](#)
- A few [SSCC-Small](#) containing various syrups, molasses, sorghum
- A couple [SSCC-Small](#) full of various yeasts
- An [SSCC-Small](#) full of 🍷 [tamari](#)
- Several [SSCC-Small](#) full of various types and grades of tea
- A couple [SSCC-Small](#) containing various types of [Coffee](#) beans
- [Booze](#). Lots of booze. (Including [Tokyo Brewing Company Beers](#), [Ainu Orchards](#) wines and beer, and [Ice Queen Sake](#))
- Many [SSCC-Small](#) containing various fruit juices
- Many [SSCC-Small](#) full of various cooking oils
- A few [SSCC-Small](#) containing vegetable shortening
- An [SSCC-Small](#) containing lard.
- A few [SSCC-Small](#) containing various kinds of dried and prepared mustards
- A couple [SSCC-Small](#) full of Yamataian-style mayonnaise.
- Several [SSCC-Small](#) containing assorted kinds of pickles, relishes, chutneys, sauerkraut, and kimchi

- A few [SSCC-Small](#) full of various vinegars and cooking wines
- A few [SSCC-Small](#) each full of Worcestershire sauce or various kinds of 🐟 [fish sauce](#).
- A couple [SSCC-Small](#) containing concentrated tomato paste
- Several [SSCC-Small](#) full of fine foodstuffs and ingredients
- Some [SSCC-Small](#) full of miscellaneous cooking ingredients
- A few [SSCC-Small](#) full of spices, herbs, and other seasonings
- A few [SSCC-Small](#) full of of table salt
- An [SSCC-Small](#) full of baking soda
- An [SSCC-Small](#) full of cream of tartar
- An [SSCC-Small](#) full of fruit pectin
- An [SSCC-Small](#) full of 🐟 [monosodium glutamate](#)
- Many [SSCC-Small](#) each full of various types of dry noodles and pasta
- Many [SSCC-Small](#) each full of assorted types of flour
- An [SSCC-Small](#) filled with various sizes of [Type 43 Yugumo Corporation Uniforms](#), both suits and dresses
- An [SSCC-Small](#) filled with various sizes of the non-uniform clothing items of [Yugumo Corporation Standard Issue](#) and [Shipboard duty items](#), packed in their duffel bags
- An [SSCC-Small](#) full of assorted sized [RHI Type 43 "Megumi" Environmental Skinsuit](#)
- Several extra sets of [Kikyō Scouts Standard Issue](#) in various sizes
- An [SSCC-Small](#) full of various sizes of assorted articles of [Emrys Industries Wet Wear](#)
- An [SSCC-Small](#) full of assorted sizes of surplus [Star Army Coat, Type 32](#)
- An [SSCC-Small](#) full of various sizes, colors, and styles of [Socks](#)
- Two entire [SSCC-Small](#) full of [Traditional Military Blanket](#)
- Several cots, tents, tent heaters, [hammocks](#)²⁴⁾, foam mats, and [sleeping bags](#)
- Some [Civilian Model Portable Shelters](#), both sizes
- An [SSCC-Small](#) containing rolls of [Molecure Tape](#)
- Two [SSCC-Small](#), of [Ionic Adhesive](#), one each [liquid](#) and [tape](#)
- An [SSCC-Small](#) full of [MultiMendFoam](#)
- Some [SSCC-Small](#) containers full of [Pico-Jelly](#)
 - Several plastic-type
 - A few metal-type
 - An exotic-metal-type
 - A few spare Multi-Frequency Delux Control Devices
- A few empty [SSCC-Small](#), [Medium](#), and [Large](#) containers
- Various sizes, form factors, and ratings of solar panels, and associated equipment
- Several pallets of [Stick-A-Wall](#) in various sizes and materials
- The parts to turn a few dozen [SSCC-XL](#) into various [SSCC-XL Prefab Modules](#)
- The parts to turn two [SSCC-Huge](#) into a [Hauler-class Logistics Ship](#)
- A few pallets of assorted types and sizes of [Jerrycan Jug](#)
- Several examples each of various kinds of barrels, kegs, and drums
- A few examples each of various kinds of buckets
- A stack of empty [footlockers](#)
- Several rolls each of different types of netting and webbing in various colors and sizes- cargo, camouflage, fishing, *et cetera*
- A few spools each of various gauges of rope, cordage, string, and chains
- Cases and boxes of all sorts of various screws, nuts, bolts, nails, and fasteners
- Several boxes of ball bearings of various sizes and materials
- Several spools each of various types of electrical and data cable, with connectors and hardware

- Several thousand meters of various gauges and materials of pipes and tubes
- Angle stock, bar stock, rods, rolled sheet, and plates of various common alloys
- A few [Jerrycan Jug](#), 20L Large full of [kerosene](#)
- Several [Jerrycan Jug](#), 20L Large full of [Diesel fuel](#)
- Several [Jerrycan Jug](#), 20L Large full of [Petrol](#)
- A few pallets of high pressure cylinders of [carbon dioxide](#) gas
- A pallet of high pressure cylinders of [oxyacetylene](#) gas
- A few pallets of high pressure cylinders of [propane](#) gas
- A few high pressure cylinders of [butane](#) gas
- A few high pressure cylinders of [nitrous oxide](#) gas
- A pallet of high pressure cylinders of [helium](#) gas
- A few high pressure cylinders of [oxygen](#) gas
- An [SSCC-Medium](#) full of [Powdered Durandium](#)
- An [SSCC-Medium](#) full of silicate sand
- An [SSCC-Medium](#) full of crushed limestone
- An [SSCC-Small](#) full of of rock salt
- An [SSCC-Small](#) full of charcoal
- An [SSCC-Small](#) full of sawdust
- An [SSCC-Small](#) full of clear silicate glass beads
- An [SSCC-Small](#) full of [mineral oil](#)
- An [SSCC-Small](#) full of bleach
- An [SSCC-Small](#) full of [isopropyl alcohol](#), 90%
- An [SSCC-Small](#) full of [hydrogen peroxide](#), 35% (Food Grade)
- Various glues, epoxies, cements, and other adhesives
- Lots of industrial lubricants, degreasers, surfactants, and solvents
- A few [SSCC-Small](#) full of fertilizers, pesticide/fungicides, and ph adjusters
- Some [SSCC-Small](#) full of assorted heirloom seeds
- [Extra supplies of medicine and drugs](#)
- Spare science laboratory equipment and glassware
- An [SSCC-Small](#) full of [EM-G16-2a First Aid Kit](#) and both types of [EM-G16-1A/1B Medical Kit](#)
- A couple [SSCC-Small](#) containing [MedicaGel](#)
- A few [SSCC-Small](#) full of [hemosynthetic fluid](#)
- A couple cases of [Liquid Bandage](#), various sized tubes.
- Several [SSCC-Small](#) full of [Saline](#)
- A couple [SSCC-Small](#) full of one-liter [Saline](#) bags, tubing, [cannulae](#) and needles for [intravenous therapy](#)
- A few cases of [Nutritional Supply Pack](#), 32-count
- Several spare [Ke-J1-E3301 - Autonomous Configurable Medical Unit](#) in original crates *with attachments*:
 - [Ke-J1-E3102 - Autonomous Basic Medicine Unit \(ABMU\)](#)
 - [Ke-J1-E3103 - Autonomous Surgical Medicine Unit \(ASMU\)](#)
 - [Ke-J1-E3104 - Autonomous Orthopedic Medicine Unit \(AOMU\)](#)
 - [Ke-J1-E3105 - Autonomous Massage Unit \(AMU\)](#)
- Several [Treatment and Examination Bed](#) in original crates

Crew Assignments

While a [Misha-Class Explorer](#) is almost fully automated and requires a crew of only one, it had five stations until upgraded to the newest revision of the [Misha-Class Bridge](#) as part of an update, becoming a 6+1 layout.

Assignment	Callsign	Clearance	Station	Rank	Jersey Number	Scout Rank	Squad Role	Duties	Billet
Motoyoshi Eidan	Prince	7	Command	Shōkō-Kōhosei (将校候補生)	01	Kiku	Leader	Captain	Captain's Stateroom
