Bai'yusaenahe'mah

Colonized in EE 004-v, the Bai'yusaenahe'mah system is primarily used for researching dangerous items; because of this, most of its planets are left untouched so that attention is not drawn to it, although there are numerous sensor outposts - manned and unmanned - spread throughout the system.

The Flag

The Flag of the Bai'yusaenahe'mah is below.

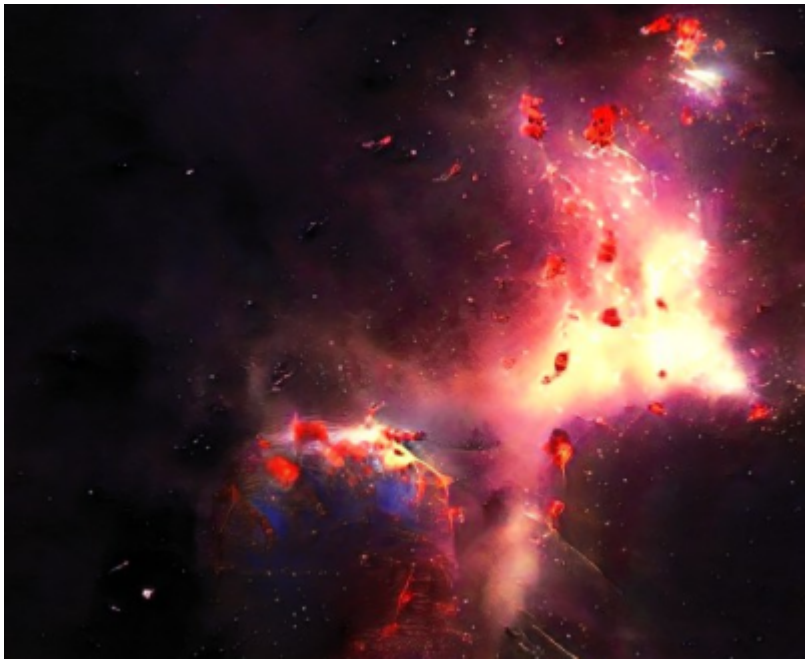

History

More facts about the Bai'yusaenahe'mah System are listed below.

- The system was first discovered, mapped and colonized by the Kingdom of Neshaten in EE 004-v (YE 41).
- The Kingdom of Neshaten focused on having this system to be focused on scientifical and engineer testing area in EE 004-v (YE 41).
- The sensor line was finished at EE 005-v (YE 43) as well as the Bai'yu IV underground military complex.

The Heart of a Bai'yusaenahe'mah

About the Bai'yusaenahe'mah System Star, Planets, and other features.

The Bai'yu Star

The heart of the Bai'yu System:

The Bai'yu Star	
System Registry	Bai'yu-G-6V
Star Names	Bai'yu
Type	G6 V Red Main Sequence
Radius	7.10 x 105 km
Surface Temperature	5300 K
Average Mass	1.74 x 1030 kg
Luminosity	4.54 x 1026 W
Number of Planets	5

The Type G6 is the primary sun of the star system.

Bai'yu 1

Bai'yu I is comprised of thousands or millions of small chunks of rock and debris; the area has several scientific probes that are used to monitor the star.

Bai'yu 2

Bai'yu II is the system's only gas giant, currently, it is not used for anything within the Kingdom.

Bai'yu 3

Bai'yu III is a resource-rich planetoid, unfortunately, it is of little use to the Neshaten due to its corrosive atmosphere.

Bai'yu 4

Bai'yu IV is a barren world and is of little to no use due to the lack of any plentiful resources that could be mined. The Shukara Volunteer Navy has constructed an underground military complex that spread throughout various cave systems. The system is used for military training.

Bai'yu 5

Bai'yu V is a toxic world with a thin atmosphere; the surface of the planet only has a few areas that are livable while the rest of it is not. A small research colony exists beneath the planet's surface. A sensor station orbits the planet.

People

The population of the bai_yusaenahe_mah System is consistent of Shukaren Laibe (Sub-Species) and small portion of Shukaren Daur (Sub-Species). Other species of other factions are not allowed to settle down on the colony. The Shukara Volunteer Navy 3rd Fleet is responsible for protection of this system.

Characters

The Characters that are located here:[1)]

Nothing found

RP Opportunities

Great roleplay opportunities.

- Military training on Bai'yu IV.
- Be part of various secret experiments on Bai'yu V.
- Come in close contact with the Kingdom of Neshaten.

Local Rumors

Maybe True, Maybe not.

- The 3rd fleet had various Daur incidents.
- Or'ion is involved with the sensor network to monitor outsiders.

OOC Notes

Kalshion created this article on 2015/03/19 20:51. Updated by Rawolfe.

- Art was created in Artbreeder and the Flag was created by Rawolfe.

This was approved by Andrew on 03/02/2021.[2] /
