HX-13

HX-13 is one of the twenty systems charted by Taisa Hanako while she commanded the YSS Elfin Princess in YE 30. It contains an Earth-like world with one moon. This lush planet *isn't* safe.

History

It was early YE 31 and the Second Mishhuvurthyar War was brewing. Seeking to expand their resources, the NMX sent a scout to the system, and found it was inhabited by the descendants of ancient human colonists. Several months later, with the war now in full swing, a Star Army ship was chased here and shot down. The survivors began a mission to find a way to signal the Star Army for help.

The YSS Eucharis entered the system in YE 32 to search for the survivors and was able to rescue three.

The Fifth Fleet looked into conducting an operation to liberate HX-13, but passed the task onto another fleet.

In late YE 34, the Legion XII took the initiative and launched Operation Kōzan with the intent to drive back the Mishhuvurthyar there and bring the Empire one step closer to ending the war.

Notable Surface Features

- Beaches (beautiful)
- Swamps (smelly and very wet)
- Rainforests (dense)

- Stone road network
- Milua River (river delta is the site of the YSS Freedom crash)
- Camouflaged local village of the Pohutsa tribe
- Mountain Bunker complex (NMX)
