System UX-26

Explored by the *YSS Aeon* in month one of YE 31.

System UX-26 contains a single F5 star, two planetoid (asteroid) belts, one terrestrial body and three gas giants.

Type:	Planetary belt
Stellar radius:	1.6 AU

Planet 1

This is the only terrestrial body in the system. It is a cold inhospitable world.

Atmosphere

The atmosphere is composed of the following in descending quantities: carbon dioxide, nitrogen, argon, methane. The atmosphere is thin and bitterly cold. Dust storms are the prominent weather feature, but due to the thin atmosphere pose little threat.

Environment

Average temp: -128º C

Significant details

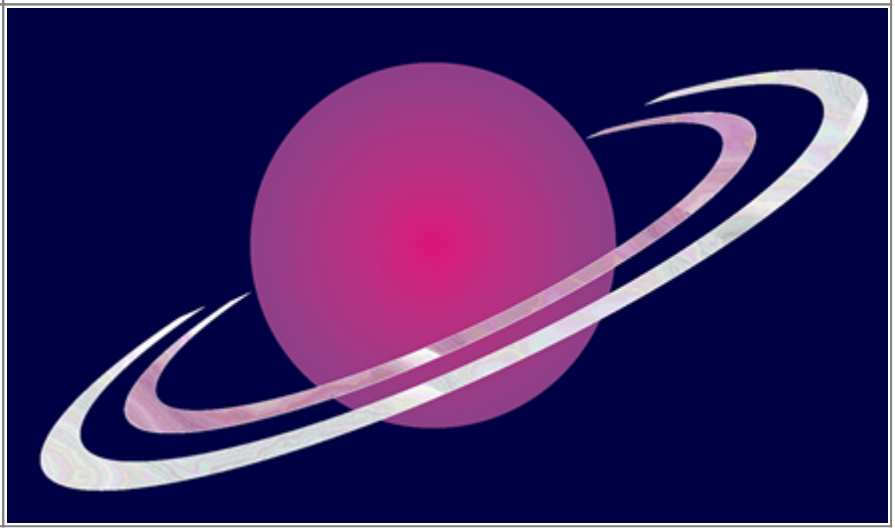

The planet has no moon, but a beautiful ring fills the sky. Planet has significant mineral deposits, pockets of ice and carbon dioxide snow dot the landscape.

Planetoid belt

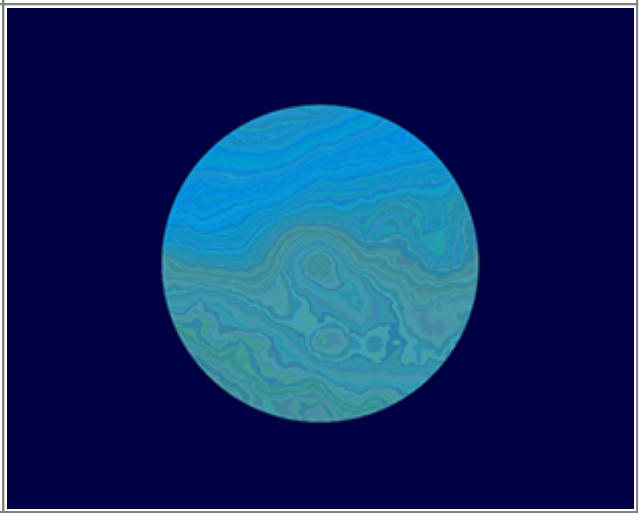

This is the third object in the system. Composed of typical left overs from the formation of the system, comprised of chunks of ice, and nickel-iron rocks.
