UX-27 System

System UX-27, or also known to Yamatai as Takara, is located east from the Chiharu Nebula and it has a former NMX base that was abandoned in YE 34 due to the events of the Second Mishhuvurthyar War. It is currently not owned by anyone, but a subspecies called the Kamakiri are present in the system on two planets.

Unusual aspects of this system are that there are no gas giants present and it used to have a captured planet. In YE 32, the NMX did build a NMX Standard Small Starport on Takara I. In YE 42 a damaged NMX Scout crashed onto Takara I after an intense battle with a Yamatai Star Empire vessel.

The system was explored by the *YSS Aeon* in YE 31.

The UMX Outpost

The NMX created their outpost on Takara I, which is known to be rich in minerals and was thus deemed as a suitable place to construct their base at. Yet the base only got about 2/3 finished when the Mishhuvurthyar recalled all forces in YE 34 to support in a losing war. It has been abandon for eight years until a NMX Scout crash-landed onto its surface close to the base. This would change the function of the outpost for good.
