

YE 36

YE 36 is the [Yamataian Calendar](#) year that began on January 1, [2014](#) and lasted until December 31st of that year.

The tentative theme for YE 36 was the “Year of Development,” in which game masters and staff focused on enriching the Star Army universe by revisiting places in the RP, adding details to articles, and adding plot hooks and vibrant RP locations to the SARP setting. Players were encouraged to explore and add to the setting, and branch out using Open RP.

Notable Events

Here's what's happened in YE 36:

- [Pyros Thrull Westwood](#) steps down as Premier & Sky Marshall of the [DION](#).
- He is succeeded by [Charlie Coast](#), who resigned from his position as [Grand Admiral](#) of [3rd Assault Fleet](#).
- [Motoyoshi Saito](#) is selected to replace Coast as Grand Admiral of 3rd Fleet. She becomes the first female Grand Admiral as well as the first servicewoman of foreign birth to reach the rank. Her position further symbolizes the permanent rift between many UOC Jiyuuians and the Yamatai Empire. Admiral Motoyoshi has distanced herself from the rest of her kin in the Empire.
- Nepleslia is represented by Premier Coast, Grand Admiral [Dominic Valken](#) and Jonathan Izgimmer as a show of Nepleslian interest in accomplishing *something* at the latest [IRC](#).
- [DATASS](#) is signed by Nepleslia and the Lorath Matriarchy, followed by Yamatai. This agreement superseded the YE 36 DION-YSE Treaty, which was never ratified by either Nepleslia or Yamatai.
- Concurrent with the IRC, [1st Assault Fleet](#) and [4th AASP](#) held war games with their respective Marine contingents in the [Nepleslia system](#). It was adjudicated by [2nd Assault Fleet](#). Prior to the commencement, all Fleet Commanders ([Rear Admiral](#) :Valencia Ironside commanded 4th Fleet in place of GADM Valken) were presented with sealed orders which were only to be opened in the event of a conflict with Yamatai. These secret orders pertained to an operation plan codenamed, "Operation Ragnarok." Their contents are not known outside the recipients and the plan's architects as they were destroyed following the end of the IRC on its first day.
- Despite protection offered under the [DioN-Free State Protectorate Treaty](#), the [The Cult of War](#) proposed an experimental defense force made entirely of Free Spacers. Though facing resistance, the proposal moved forward and led to the creation of a [small force](#) under the tutelage of the [SMDioN](#).
- Late in the year, all four Grand Admirals met at [Veritas](#) to discuss the future, the allocation of forces, and the potential threats to the Imperium.

- Luca gets a body transfer from a [NH-22C Yamataian](#) to a [Minkan](#). Unbeknownst to him, his doctor and handler for this operation, an old Phoenix veteran by the name of [Jimothi Trakk](#) slipped him a
